

# A.W. Beattie Career Center

## Spring Open House

### 5:15-8:00pm March 24

The new Surgical Sciences program provides hands-on experiences to students with real equipment used in central sterile processing and operating rooms.

The new SimSpray machine in the Auto Collision program virtually prepares students to work in the Career Center's industry standard paint booth.

The Health and Nursing Sciences program's new State-of-the-Art Healthcare Suite enables students to develop skills in acute outpatient, and skilled nursing settings.

Students meet and learn to work with peers from other school districts and programs to develop professional workforce skills and to collaborate across a variety of industries.

This event is open to everyone. Masks may be required.

We look forward to meeting you!
