

Blackboard

We are very excited that our Blended Learning initiative is continuing to grow through the use of Blackboard! As a part of the initiative, **parent access to Blackboard will be available in early October**. More information about how parents can access Blackboard will be sent to parents via an email blast closer to the release date.

Please note that Blackboard is only used by students in grades 6-12.

Below are some tips you can use to easily access Blackboard using your child's account (you can always ask your child for their username and password until you receive your parent login):

- You can access Blackboard from the NASH website by clicking on the "Blackboard" link on the left menu bar or by typing the URL found at the bottom of this document.
- Your child's Blackboard username & password are exactly the same as their NA computer username and password.
- Once you have logged into Blackboard using your child's username/password, you will be able to see all of your child's current classes listed along the right side of the screen.
- You can click on any class to see what the teacher has uploaded for your child's course.
- You can click the word "Calendar" (left side of screen) in any class; here you will see HW posted for your child's class and every teacher's HW assignment your child has at school.
