

APUSH Unit Review Project
Mr. Tengowski

In order to better review for the APUSH test, you are going to be responsible to outline the units that we cover this year in the course. For this assignment, each of you will be required to assemble a “study aid” and organize a unit of APUSH for the rest of the class. This assignment will be worth 50 points and will be counted towards your final grade.

Here are the required sections of the review:

1. A complete listing of important people identified within each Unit. There should be an accompanying sentence to why are they important?
2. A complete listing of important legislation passed by the US Congress or about the US within each unit. There should be an explanation as to the importance of each act.
3. A complete listing of foreign involvements/wars/treaties that we were involved within each unit. A short explanation of all is required.
4. A complete listing and defining of all important vocabulary terms that may be found within the unit.
5. 20 AP level Multiple Choice questions must be created with 5 possible answers each that summarize the unit. These must be of your own creation.
6. Two possible essay topics are to be created using what was gleaned from the Unit.

These are all to be shared with me via Google Docs by the dates listed below...
