Thank you for downloading this freebie! I hope that this helps your students with Phoneme Segmentation in preparation for the DIBELS test.

To prepare, print the pages and laminate for durability or place in a sheet protector.

All you need to play is a dice!

I Can...

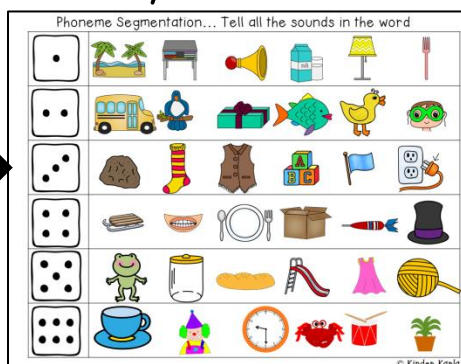

Choose a card.

Roll a dice.

The number on the dice tells you what row to read.

Look at the first picture. Say all the sounds in the word. Keep going until you finish the row.

When you have finished the row, let your partner have a turn.
