<sup>\*</sup>The increase in Professional employees is a result of the addition of Long Term Subs due to professional staff members on leave of absences/sabbaticals

# Mid-Year Staffing Numbers

- The overall maintenance of District staff has remained constant for the 2016-2017 school year. The employee counts include both those out on leaves and the substitutes. These numbers allow the District to report appropriately to the Department of Education and also maintain better overall numbers for forecasts and projections.
- With over one thousand employees, 630 of whom are professional educators, many issues arise that cause absences within the groups. Most significantly these include three categories:
  - Unpaid leaves of absence due to illness or disability impact counts. Collective Bargaining Agreements allow administration to recommend to the School Board approval of leaves from six to 18 months dependent upon circumstances and information from physicians.
  - Leaves of absence for child rearing/bearing, a recognized and acceptable absence identified in both the North Allegheny Federation of Teachers contract and Federal Labor Law.
  - Family and Medical Leave Act (FMLA) which protects any employee, who have accrued 1250 hours of work in one year, for up to three months of absence (paid or unpaid) while maintaining benefit coverage. These absences, if documented by a physician, include illnesses of family members and can be extended or intermittent.

#### Additional Information

- There are numerous situations of accidents, illnesses, or surgeries that require the District to bring in long-term substitutes for the purposes of maintaining dayto-day functions of the District. Only approved and documented leaves of absence are permitted by the District. All information is reviewed in the Human Resources Office and brought to the Board for approval.
- Increases to the paraprofessional group are specific to the needs of our student population. These increases are well-documented through a 20-day, data collection process and requirements of Individualized Educational Plans. Our goal is to assist students to progress through the curriculum by affording them the necessary supports to be successful while carefully monitoring the goal of independence.
- \*NOTE: Because of the sheer number of staff, totals fluctuate on a daily basis. Resignations, retirements, leaves, hires, and position transfers impact and frequently change the counts of each group. We refer to the data in this report as a 'snapshot' in time because on any given day, the number will most likely be different.
